NIGHTGUARDS ARE
THE FUTURE!*

-DR. KEGLER

Our bite splint or night guards are a digitally designed, patient-specific, 3D-printed device using HeyGears 3D printers in bio-compatible material. In addition to their ability to alleviate the damage caused by parafunctional habits, night guards also aid in offsetting and preventing the effects of teeth grinding and protect existing dental restorations from daily wear and tear.

US DESIGNED BY HEYGEARS**

ABOUT

Integrity uses 3 UltraCraft A2D printers and 1 UltraCraft A2D 4K with HiVE (High-volume Enabler) to produce dental products. The A2D can print 50+ dental applications using our certified UltraPrint-Dental materials. The A2D 4K is an ultra-high precision 3D printer that can be paired with the HiVE module to enable continuous, unmonitored production for up to 16 hours, making 24/7 production a reality.
